Data Auditing Observatory

indicium

dbt package for leveraging data auditing observability!

Business Value
Leverage the data auditing processes' observability through 3 powerful macros that make the AE's lives easier.

Goal
Expand the visibility of the data auditing workflow in all of its steps, including EDA, table structure overview and detailed column level data compatibility reports.

Development
Create automated data auditing reports, that can be materialized in a Quality Assurance layer in dbt and shared with stakeholders.
